

Binfo smartphone app now owned, supplied & supported by Integrated Skills

Integrated Skills (UK) Ltd (ISL) is proud to announce that the UK's leading smartphone app for management of waste & recycling collections by residents – "Binfo" – is now owned, supplied and fully supported by ISL.

Patrick Scott, ISL Managing Director, states "We develop, support and supply a range of apps for use by our local authority clients and their contractors in the UK and overseas. Binfo is our first that is used directly by members of the public and we plan to enhance it's functionality further, integrating it fully with our RouteSmart for ArcGIS solution, as well as provide ongoing support for years to come."

The app is currently available on two platforms – Android and iOS and a Windows version is on the development plan ensuring inclusivity for all local authority residents.

Making it easier for residents to manage their waste & recycling collections leads to improved participation rates, as well as reducing the number of calls to the contact centre, and is far more cost effective than using text alert systems.

The Binfo smartphone app enables residents to:

- Set alerts to remember when to put the bin out (and which one)
- Review what items go into which bin
- View a collection calendar

With Binfo local authorities can:

- Notify residents of changes to collection days
- Send reminders of paid-for collections (bulky, garden, clinical, etc.)
- Engage directly with residents when introducing new services, such as food waste collection
- Notify residents if there is a delay to the service
- Inform residents of recycling targets met

Sales Director of ISL, Alan Paget, highlights that Binfo has the potential to do more than just a waste & recycling app for residents: "The route map for the software includes functionality that will enable members of the public to report issues to their local authority when out and about, such as, offensive graffiti, dog fouling, fly tipping, etc.. Photographs and video can be included on the report created, and each report can contain the exact location of the issue utilising the device's GPS fix."

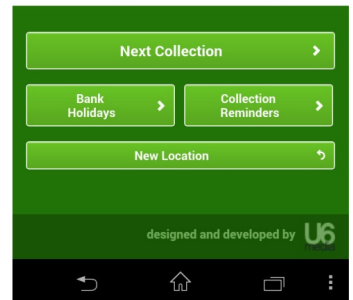

Collection Details

Monday February 17 2014

Green Kitchen Waste Bin, Green Paper & Card Bag, Green Glass & Cans Bag and White Garden Waste Bag.

Green Kitchen Waste Bin

Bin Information

Please put the following items in the Green Kitchen Waste Bin

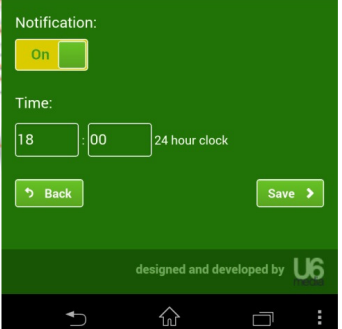

- Egg Shells
- Fruit and vegetable peelings
- Left over cooked food (eg rice, pasta, vegetables)
- Meat, fish, stale bread, seeds, cereals, cheese
- Small bones up to & including chicken carcass, lamb bone or leftovers from a typical family roast
- Small items of cardboard food packaging that have been in contact with food or food waste

Collection Reminders

Would you like to be reminded to put your bins out the day before each collection? (A bell will sound and a message will appear in your notification bar).

These are dynamic reminders. They require a minimal infrequent internet connection at least (once or twice a week) to work. The alarms can adapt and change to reflect last minute unscheduled changes to your bin collection day!

About Integrated Skills Limited

Integrated Skills (UK) Limited (www.ukisl.com) operating out of Romsey near Southampton, is a specialist provider of GIS routing and optimisation software, smartphone & tablet solutions, environmental management software, highways management software as well as environmental consultancy.

ISL's smartphone & tablet apps enables users to collate and disseminate data related to services in three core sectors: Environmental, Highways, Parcel & Post and Utilities.

ISL's routing and optimisation software solutions maximise efficiency through enhanced route planning resulting in reductions in fleet size, mileage, planning time and human resource, more balanced routes/rounds, more accurate ETAs and enhanced route management information. The software is used in operational and strategic environments as well as for scenario planning when introducing new customers, vehicles, routes and services.

The company also provides the GIS based Trafficworx solution for the management & coordination of road work activities.

ISL is the leading partner of RouteSmart Technologies Inc.™ (www.routesmart.com) for high density, door-by-door and street-by-street route optimisation software

ISL is a partner of ESRI for the ArcGIS platform (www.esri.com).

ISL is an Ordnance Survey partner (www.ordnancesurvey.co.uk).

For further information contact Alan Paget, Sales & Marketing Director at ISL.
