

Alison Crooks of ISL's environmental planning, permitting and consultancy services team returns from a project in the Falkand Islands

ISL's environmental permitting and consultancy team, led by Alison Crooks, continues to provide advice and services to a number of organisations in the waste management sector.

Alison has just returned from the Falkland Islands where she conducted a waste audit. She accompanied the waste collection team and undertook an analysis of the waste with a view of providing advice on recycling as well as waste minimisation and re-use opportunities.

She returned by way of Ascension Island and carried out another waste audit. Whilst on the islands she managed to snap some pictures of the local wildlife!

Alison's most recent projects include winning planning permission on Appeal for a large private sector waste facility in Essex and also gaining planning permission from Surrey County Council for the development of a 10,000 tonnes per year open windrow composting facility. The application faced significant opposition from local residents and there had been two previous attempts by the applicant. A major constraint to overcome was the location of the site in the Green Belt.

Alison and her team provide a wide range of services including:

- Planning applications and Appeals
- Planning Enforcement
- Environmental Permit Applications and Appeals
- Accident Management Plans and Risk Assessments
- Environmental Management Systems and related compliance documentation
- Site Condition Reports
- Advice on Environmental Permitting Regulations
- Exempt Activities
- Technical Competence

About Integrated Skills (UK) Limited

Integrated Skills (UK) Limited (www.ukisl.com) operating out of Romsey near Southampton is a provider of:

- Route planning and optimisation software solutions
- Environmental consultancy, planning and permitting
- GIS and systems to manage spatially distributed assets

Environmental consultancy, planning and permitting clients include local, private waste contractors, local authorities as well as national governments.

ISL's routing and optimisation software solutions maximise efficiency through enhanced route planning resulting in reductions in fleet size, mileage, planning time and human resource, more balanced routes/rounds, more accurate ETAs and enhanced route management information. The software is used in operational and strategic environments as well as for scenario planning when introducing new customers, vehicles, routes and services.

ISL is the leading partner of RouteSmart Technologies Inc.™ (www.routesmart.com) for high density, door-by-door and street-by-street route optimisation software as used in Local Government Services, Postal Services, Newspaper Distribution, Environmental Services and in the Utility sector for meter reading, meter inspections and meter implementation programmes. RouteSmart's underlying GIS technology is from ESRI (www.esri.com).

For further information contact Alan Paget, Sales & Marketing Director at ISL.
