

Press Release

ISL Invited to CMS Supertrak Ettington Chase, Stratford-upon-Avon, April 23, 2015

Route Optimisation specialist, Integrated Skills Ltd, has been invited to participate in the CMS Supertrak client event at Ettington Chase, Warwickshire. The prestigiuos event showcases a range of technologies and software solutions related to CMS Supertraks core offering.

Clients from a diverse range of market sectors attend to develop there knowledge of the latest technologies that contribute to efficiency savings, compliancy and enhanced fleet management.

The day is separated into various activites ranging from a plenary session though speed dating to technology specific presentations.

The day is deliberately informal to faciliate an atmosphere condusive to knowledge sharing and learning.

ISL's core focus is route optimisation and planning software using GIS technologies combined with map data primarily from HERE (formerly Navteg) and the Ordnance Survey.

CMS Supertrak and ISL have joint clients in the UK local authority sector.

More About CMS Supertrak

Founded in 1993, CMS SupaTrak is a leading vehicle telematics company, with considerable expertise in vehicle tracking, CANbus integration, remote worker applications and systems integration. Their headquarters operates out of Swindon where the team of 40 telematics specialists service and support over 25,000 deployed solutions across the UK and continental Europe.

CMS SupaTrak design, manufacture, manage and deploy all of our own in house solutions under a fully managed and warranted service proposition ensuring end to end management by an accountable team.

About Integrated Skills Limited

Integrated Skills (UK) Limited (www.ukisl.com) provides route optimisation, route planning, Geographic Information Systems (GIS) and related solutions for the management of spatially distributed assets. The route planning and optimisation software solutions portfolio maximises efficiency through reductions in fleet size, mileage, planning time and human resource, more balanced routes/rounds, more accurate ETAs and enhanced route management information. The software is used in operational and strategic environments as well as for scenario planning when introducing new customers, vehicles, routes and services.

The non-route optimisation systems improve internal efficiencies and enhance citizen facing services and includes online and Cloud based job/task management solutions, SmartPhone Apps and related consultancy.

ISL serves a number of market sectors including waste management, logistics, utilities and post & parcel.

ISL is the leading partner of RouteSmart Technologies Inc.™
(www.routesmart.com) for high density, door-by-door and street-bystreet route optimisation software as used in Local Government
Services, Postal Services, Newspaper Distribution, Environmental
Services and in the Utility sector for meter reading, meter inspections
and meter implementation programmes. RouteSmart's underlying GIS
technology is from ESRI (www.esri.com).
