

Case Study

RouteSmart Technologies™ to exhibit at Post Expo 2014, Stockholm, Sweden

Date for your diary: RouteSmart Inc will be exhibiting at Post Expo 2014 to be held in Stockholm, September 23 - 25. The latest version of RouteSmart for ArcGIS will be available to view on the stand.

POST-EXPO travels each year to a different venue in Europe and elsewhere around the globe, and has gathered worldwide recognition and support. The international nature of the participants means that views, new ideas, innovations, new products and services presented at the event have a truly global perspective.

Established as one of the most influential forums for the selection of suppliers to postal and parcel operators across the globe, the exhibition provides an unrivalled opportunity for visitors to see and experience the very latest innovations for the postal and parcel industries. From automation solutions and retail services to delivery vehicles, tracking solutions and route optimisation, visitors will find that the exhibition always has something new to discover, with many companies using the exhibition as a platform to launch new products, services and technologies.

RouteSmart has exhibited at the event every year meeting new prospects, current clients and business partners. ISL is the leading partner of RouteSmart Technologies (www.routesmart.com) for high density, door-by-door and street-by-street route optimisation software as used in Local Government Services, Postal Services, Newspaper Distribution, Environmental Services and in the Utility sector for meter reading, meter inspections and meter implementation programmes.

RouteSmart's underlying GIS technology is from ESRI (www.esri.com).

Case Study**About Integrated Skills (UK) Limited and Descartes Systems Group**

Integrated Skills (UK) Limited (www.ukisl.com) operating out of Romsey near Southampton, is a specialist provider of routing and optimisation software solutions. ISL's routing and optimisation software solutions maximise efficiency through enhanced route planning resulting in reductions in fleet size, mileage, planning time and human resource, more balanced routes/rounds, more accurate ETAs and enhanced route management information. The software is used in operational and strategic environments as well as for scenario planning when introducing new customers, vehicles, routes and services.

ISL has clients in the Postal Services sector including TNT Post and Isle of Man Post using RouteSmart for ArcGIS as well as clients in the utilities, retail, waste & environmental services and food sectors.

For further information contact Alan Paget, Sales & Marketing Director at ISL.
